

AES

EQUIPMENT SOLUTIONS

CAPABILITY STATEMENT

OVERVIEW

Based in Perth, Western Australia, AES Equipment Solutions has one of the largest undercover workshops, equipped with the latest technology to provide highly cost-effective services including manufacturing, earthmoving equipment repair and maintenance.

We are committed to providing our clients with superior customer experience and a broader range of flexible mining services.

We pride ourselves on contributing to our customers' success by driving excellence and innovation in our service delivery.

AES Equipment Solutions is the **specialist** in all types of **earthmoving equipment, repairs and refurbishment.**

COMPONENT REBUILDS

AES Component Rebuild Facility has the ability to service and repair the full CAT product range of major machinery and equipment components, as well as other manufacturers.

This includes transmissions, engines and final drives to hydraulic pumps, motors and cylinders, torque converters and others.

LINE BORING, WELDING & FABRICATION

AES provide line boring services using an in-house boring machine. This provides clients with a cost-effective alternative to dismantling equipment for repairs. We provide fully qualified boilermaker-welders with experience in major structural repairs, modifications and general repairs.

NDT-UT (Non Destructive Testing - Ultra Sonic Testing) and Heat Treatment/Baking Oven for stress relief on all major repairs if required.

MECHANICAL & ELECTRICAL REPAIRS

AES provides a comprehensive component and mechanical repair service for all types of earthmoving equipment repairs. We have the capacity to repair anything from a minor oil leak, to a complete refurbishment of a chassis or a complete machine.

Our experienced personnel can perform general machining, rebuilding or refurbishing on equipment from leading brands such as Caterpillar, Liebherr, Komatsu, Hitachi and Terex. Not restricted by dealer constraints, AES is able to source the most competitive prices for replacement parts, providing significant cost savings to our clients.

QUARANTINE CLEANING

AES provides quarantine cleaning services for industrial mining equipment in line with strict international standards.

Our purpose-built facility includes wash-down areas to offer a quick response, and capacity to provide a complete cleaning service in one location.

SANDBLAST & PAINT

AES maintain an industrial sandblasting and industrial painting facility, considered one of the best in Western Australia.

Our weather-proof industrial sandblasting booth has the capacity to sandblast four large earthmoving machines at one time. A number of mining machines can be painted simultaneously in the adjoining 640 square metre industrial painting spray booths, providing a highly efficient service to our clients.

OUR PEOPLE

AES is committed to providing ongoing support to our employees through training and development programs.

Each year we run an Apprenticeship Program that allows tradespeople to learn the fundamentals and skills of their trade whilst being mentored by highly skilled staff.

AES also provides work experience opportunities to students who attend schools within the local area.

We pride ourselves on being good corporate citizens, supporting our local community through fundraising and charity events.

AES Equipment Solutions offer a complete **one-stop-shop** for all services to the **mining and resources** industries of Western Australia
