

Powering
Innovation™

*Industry leaders in
electrical innovation
and integration with
the persistence, agility
and commitment to
always deliver*

OFI's dynamic team of experts specialises in **Industrial Electrical Design & Construction, Automation and Instrumentation** within the **mining & resources sector, government & defence, fuels & explosives** and other key markets.

At OFI, we take pride in our ability to adapt to the rapidly changing needs of our clients.

No matter how complex or challenging your project may be, we power its success by:

- // Drawing on our highly skilled in-house experience and expertise
- // Being a dedicated and collaborative project partner, focused on understanding client needs to deliver solutions that meet functionality, cost and timeline objectives
- // Maintaining an impeccable safety record borne from a culture that prioritises safety and is facilitated by a robust and internationally certified Health, Safety, Quality & Environmental Management System
- // Embracing emerging technologies within our sector to deliver cutting edge solutions tailored to your unique needs
- // Investing in systems, training and infrastructure that power innovation and efficiency

HEALTH & SAFETY

Protecting the health and safety of our people and yours is vitally important to us. We are committed to maintaining an effective Safety Management System in accordance with ISO 45001 and complying with all regulatory, site and industry requirements. OFI's rigorous safety system is also accredited by the Federal Safety Commissioner under the Australian Government building and construction Work Health & Safety Accreditation Scheme.

QUALITY

- We comply with all regulatory and industry requirements
- An effective Quality Management System is maintained in accordance with ISO 9001
- All projects and products are delivered to highest quality
- Our team continually reviews what we do
- We use our leanings to improve our standards

ENVIRONMENT

- OFI is committed to minimising environmental impact
- We maximise the use of renewable resources
- Environmental management practices are regularly, reviewed and maintained in accordance with ISO14001
- We instil the highest environmental values in our people

Powering Success across Australia

Design and Construction

OFI delivers robust and high performing design and construction solutions from initial concept through to commissioning and operation

- // Project management and consultancy
- // Electrical design and drafting services
- // MCCs, switchboard and panel design and manufacture
- // Instrumentation, procurement and commissioning
- // Plant automation and programming
- // Planned and shutdown maintenance and testing
- // Industrial construction and calibration / commissioning
- // Hazardous (potentially explosive) area
- // Classification, design, installation and testing

Automation

OFI has a long history of implementing comprehensive automation and control solutions, with the resilience to operate reliably in remote and challenging environments across Australia

- // Highly specialised and unique systems
- // Mining and materials handling and processing
- // Industrial processes
- // Combustible, flammable and explosive processes
- // Electrical power generation, transmission and distribution
- // Water treatment and distribution
- // Waste-water treatment and distribution
- // Communication systems

Instrumentation

OFI is an expert in seamlessly integrating new and legacy equipment into comprehensive automation systems

- // Testing, commissioning, calibration and performance certification of instrument and control systems
- // Accredited design, implementation and certification of safety instrumented and functional safety systems
- // Procurement, installation and commissioning of a range of process sensors – including level, flow, temperature, pressure and position
- // Chemical dosing and analysis equipment
- // Providing equipment for motor control centres eg PLCs and energy management systems
- // Fire, security and CCTV systems
- // Developing instrumentation solutions tailored to your unique specifications and application
